Designing a Workflow for Managing Readings

Kaushar Mahetaji kaushar.mahetaji@mail.utoronto.ca PhD Student University of Toronto January 14th, 2024

Use the chat feature to answer the following question:

What are some challenges you've encountered when completing academic readings?

Use the chat feature to answer the following question:

What is your current workflow for organizing readings?

What are the advantages of establishing a workflow for readings?

- Save time and increase efficiency by removing unnecessary, repetitive work
- Easily retrieve useful research material when completing literature reviews and research projects
- Prevent accidental plagiarism by documenting sources
- Avoid information overload in the research process
- Improve research quality by scanning for multiple perspectives and biases

By the end of this workshop, you will be able to...

- Describe the value in organizing readings
- Compare various "literature mapping tools," including ResearchRabbit and Litmaps
- Create a Notion database to pinpoint the purpose, disciplinary focus, relevance, and usability of readings
- Experiment with Markdown-based, knowledge-building software Obsidian
- Propose a personal workflow for managing readings

AGENDA

Importance of Managing Readings

Finding Relevant Literature Research Rabbit and Litmaps

Devising a Personal Wiki Obsidian

Purpose of Reading Workflow

Creating and Organizing Notes
Notion

Literature mapping tools simplify the process of forward and backward reference tracking

Forward Reference Tracking

- Cited by: Which article(s) have cited the article I have?
- Check 'cited by' on Google Scholar or Scopus

References

 Cites: Which article(s) does the article I have cite?

Backward Reference Tracking

Check the bibliography/reference list

A history and future of Web APIs

Finding Relevant Work: Litmaps and ResearchRabbit

Creating and Organizing Notes: Notion

Use literature mapping tools to find relevant research for classes and research projects

 Literature mapping tools: Usually Al-based applications that help you discover research relevant to your topic of interest

- Examples:
 - ResearchRabbit
 - <u>Litmaps</u>
 - ConnectedPapers
 - <u>Inciteful</u>
 - <u>citationchaser</u>
 - VOSviewer
 - PURE suggest
 - <u>Citation Tree</u>
 - Open Knowledge Maps
 - <u>Location Citation Network</u>

Finding Relevant Work: Litmaps and ResearchRabbit

Creating and
Organizing Notes:
Notion

ResearchRabbit and Litmaps are two very similar, popular tools for finding relevant literature

ResearchRabbit

- Free
- Find connections between articles and authors
- Obtain abstracts
- See list of comparable work
- Create visualizations of relationships between papers and authors
- Keep finding new scholarship

Litmaps

- <u>Free</u> for 100 article searches + 1 map w/ paid options
- Create "seed maps"—a small map comprising the top citations and references for an article
- Explore specific areas of research with a 1 degree search
- Visualize connections between articles—see which authors are in conversation
- See which articles remain disconnected/own niche

Obsidian is a Markdown, locally-based knowledge management tool focused on linking concepts

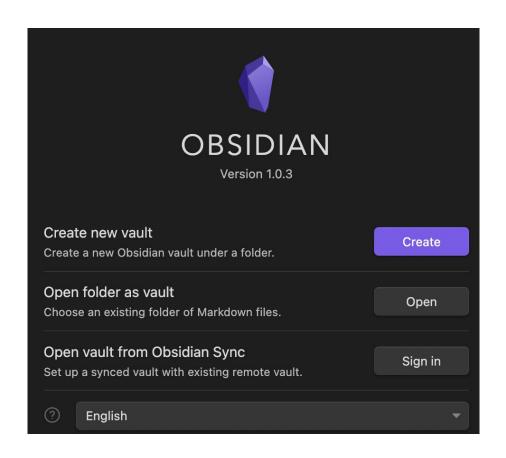

- Uses <u>Markdown</u> for formatting notes
- Not cloud-based but can purchase <u>Obsidian sync</u> (not necessary if already backing up computer files)
- Free personal plan
 - No account necessary
 - Use community plugins

Creating and Organizing Notes: Notion

Explore Obsidian

- Download Obsidian: https://obsidian.md/download
- 2. Make a vault
- 3. Turn on community plugins
- 4. Add the following features:
 - Note with headers and backlink
 - <u>Advanced Tables</u> plugin
 - Folder
 - Spellcheck
- 5. Open graph view
- 6. Personalize your page
 - Theme
 - Hotkeys
